

4-29 APPENDIX – LIST OF THIRD PARTY PROCESSORS

DATA PROCESSORS

We use third party data processors to provide us with a management information system, accounts software, cloud storage services, apps and software for use in the classroom and to facilitate the secure transfer of data between the school and central office. This use of data processors will only take place if it is in compliance with the General Data Protection Regulation.

Decisions on whether we contract with these third party processors are subject to a robust approval process and are based on a detailed assessment of the purpose for which the data processing is required, the level and sensitivity of data involved and the arrangements in place to store and handle the data. To be granted access to pupil level data, data processors must comply with strict terms and conditions covering the confidentiality and handling of data, security arrangements and retention and use of the data.

List of 3rd party processors:

MIS System	ISAMS
